**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, are drawn to **Mechanized store** Subject matter, a cash registering system of convertible checkout station, classified in class 235, subclass 383.
  - II. Claims 11-20 are drawn to **software configuration subject matter**, classified in class 717, subclass 121.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of the invention II and I are:

Claims of group I is in **Mechanized store** Subject matter since Claims of group I as a whole are in mechanical parts of a cash register;

Claims of group II is as in software configuration subject matter since Claims of group II as a whole are in a process of software configuring.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

**To avoid a delay of the transfer to the different technology, Examiner respectfully requests Applicant electing the Claims of group II, Claims 11-20 for immediately examining.**
